The diagram illustrates the multiplication of two sets of curves. On the left, five curves are shown, each consisting of a large oval with a diagonal line through it, and a small oval attached to its right side. The small ovals have various diacritics: the first has a single dot above it, the second has a single dot below it, the third has a single dot above it, the fourth has a tilde over it, and the fifth has two dots above it. A large 'x' symbol is positioned between the two groups of curves. To the right of the 'x', there are three more curves, each consisting of a large oval with a diagonal line through it, and a small oval attached to its right side. The small ovals have diacritics: the first has a single dot above it, the second has a tilde over it, and the third has a single dot above it.
